CUSTOM INDEX PRODUCTS

EXPLANATION OF TERMS FOR INDEX TABS

Bank: A single row of tabs in consecutive order. Example: If you order sets of 10 tabs, 1/5th cut, and your titles are numbers from 1 to 10, numbers 1 - 5 will make up the first "bank" and numbers 6 - 10 will make up the second "bank".

Tab: The extended portion of the sheet, usually covered with protective, clear or colored Mylar®.

Tab Extensions: The measurement of how far the tab extends from the page, normally 1/2".

Set: The entire group of tabs. As in the above example, numbers 1 - 10 make up an entire set. The total number of banks also makes up the set.

Cut: The length of the tab. For long titles, larger cuts are advised to fit words comfortably on the tab.

Position: The place where the tab falls in a bank. For example, the number 3 tab in the example above would fall in the 3rd position of the 1st bank of 5.
